

# Modelling Tuber blight with PLANT-Plus

EuroBlight workshop  
Bologna  
2-5 May 2007  
Presented by Jan Hadders

# Modelling Tuber blight

Dacom office at  
"Waanderveld"

Dacom Plant Service BV, started in 1987  
Emmen, The Netherlands (May 14)

*Leading Provider in  
Decision Support Systems  
for crop management  
with PLANT-Plus.*

Our key words:

- High quality of products and services*
- Adding value for the grower*
- Optimized use of resources*
- Motivated team with a knowledge of the crop*

OUR SLOGAN:

*Growing in confidence*

# PLANT-Plus input

local  
weather  
data

10 days  
weather  
forecast

soil sensor

crop data

scientific  
knowledge

# PLANT-Plus output

**insect control**

**disease control**

**Tuber blight**

**irrigation management**

# Modelling Tuber blight

International experiences  
in DSS usage:

## Irrigation Management

- **Planning based on ET0 modeling**
- **Monitoring on bases of sensors**

# Modelling Tuber blight

# Modelling Tuber blight

## Calculating tuber wettness situation

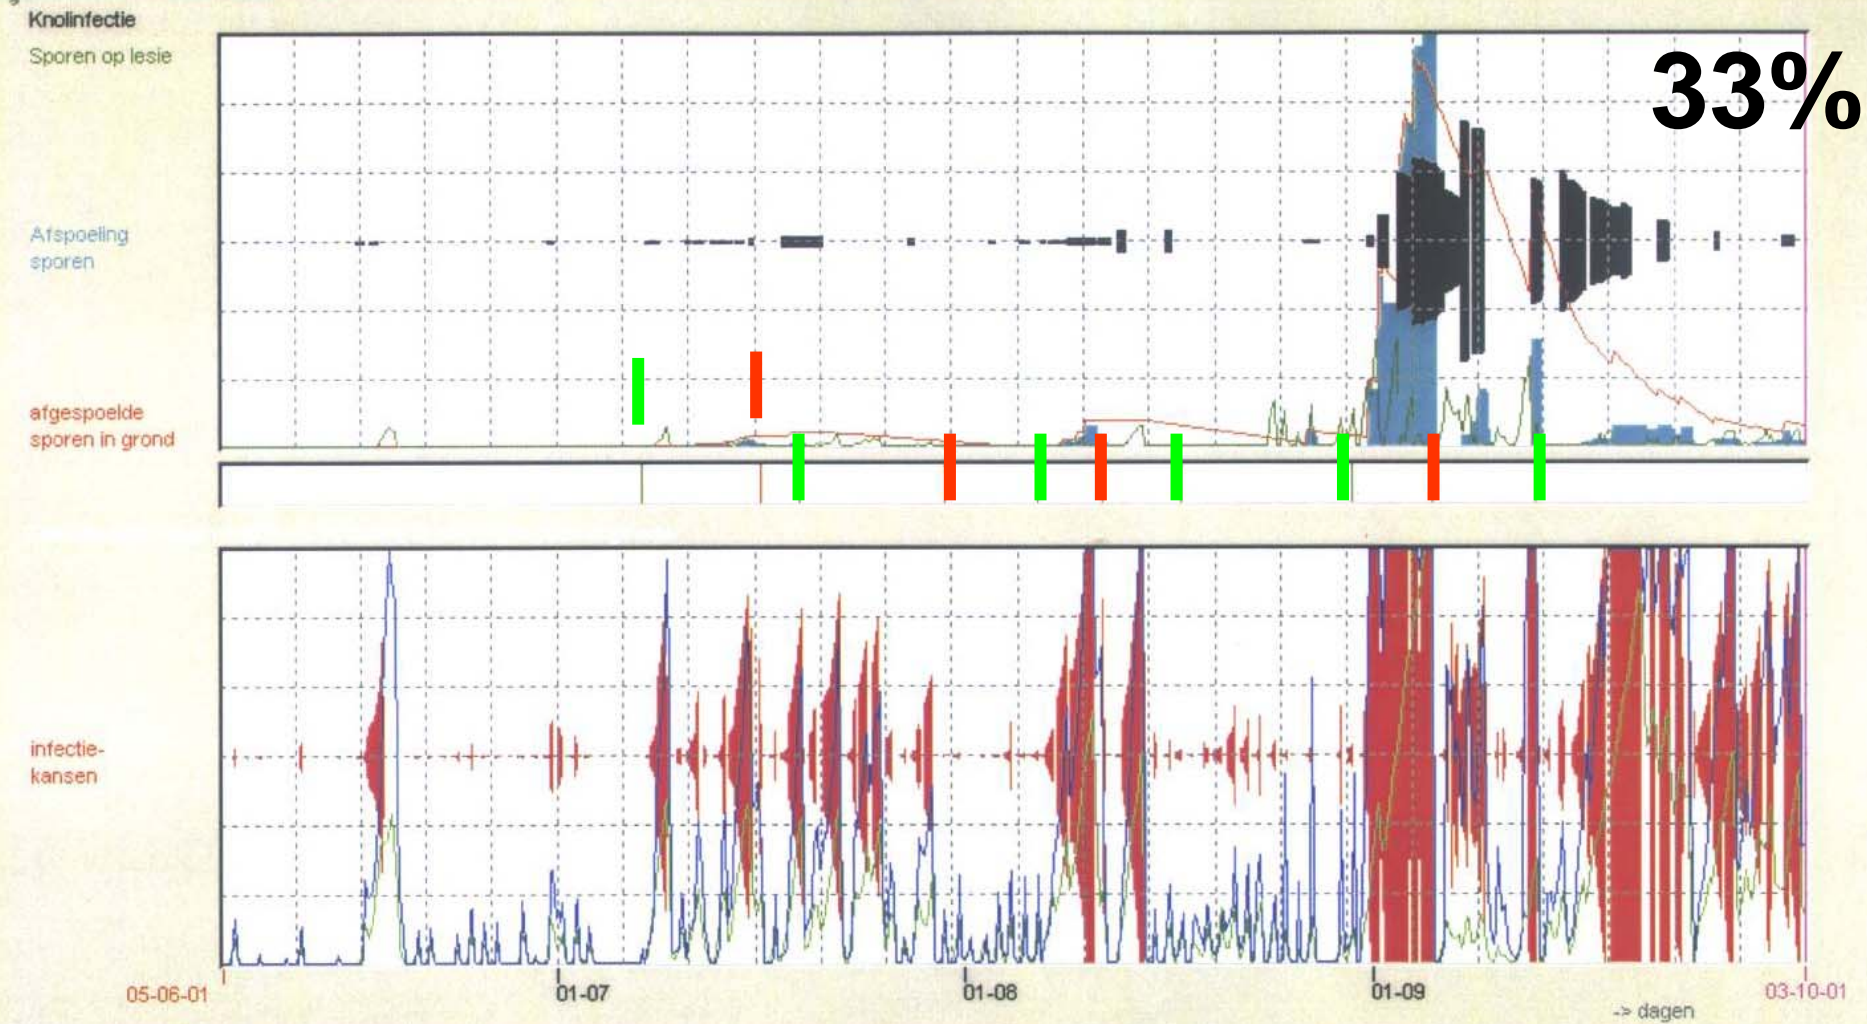

# Tuber blight Modelling Tuber blight

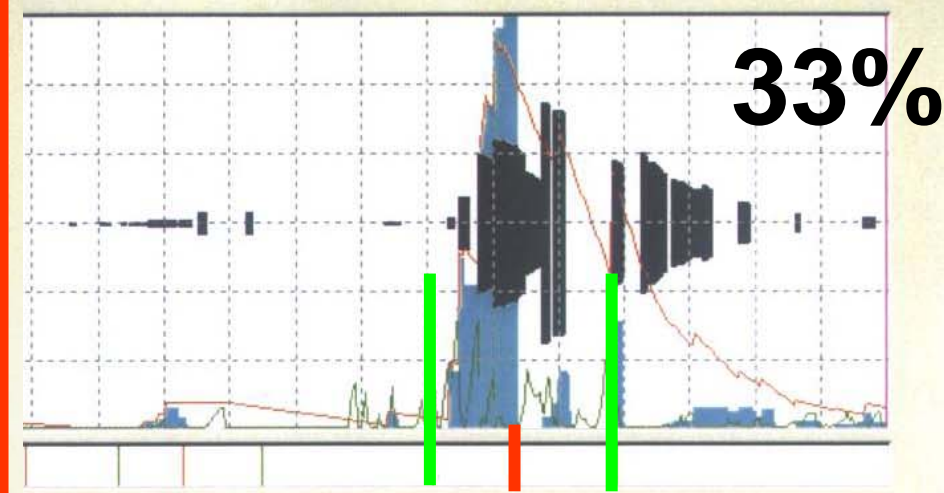

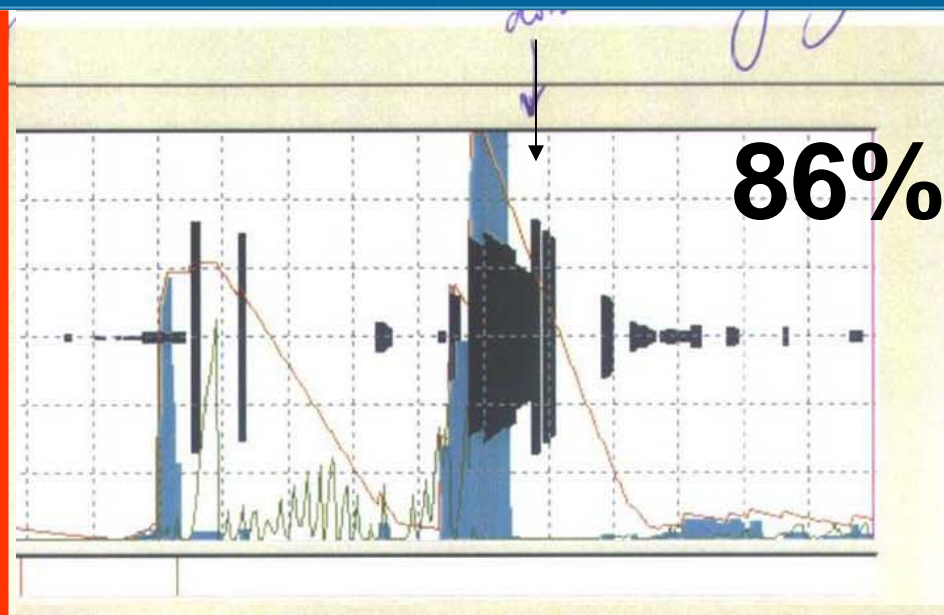

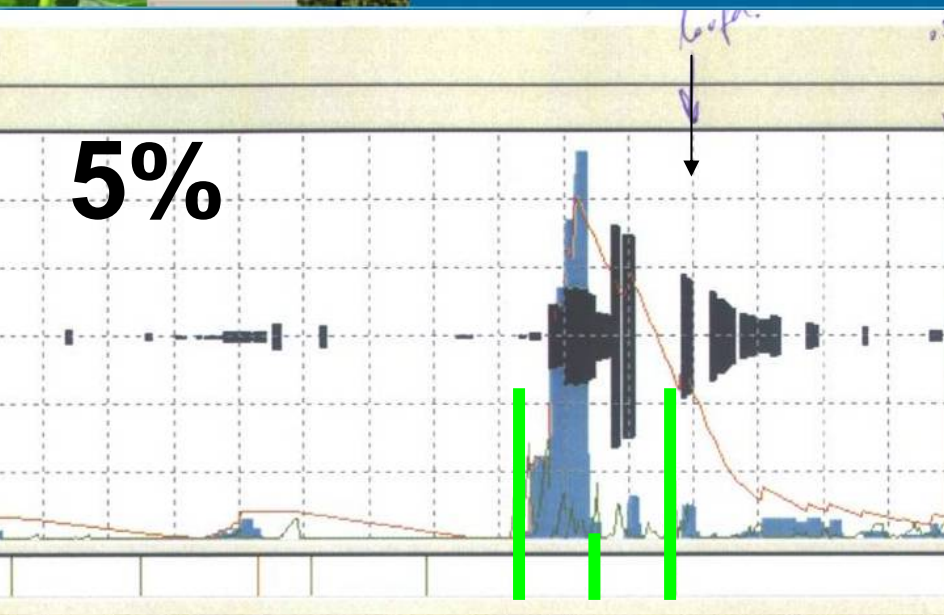

# Modelling Tuber blight

Spray 1:

31-8    ----  
27-8    30-8

Spray 2:

6-9    ----  
5-9    5-9

Spray 3:

12-9    ----  
12-9    13-9

## Summary Tuber Blight Infection:

- Lesion to be present in the field
- Viable spores present
- Sufficient rain to get spores in suspension
- Sufficient rain to wash spores down the stem
- And into the soil near the tuber
- --
- Viable spores in the soil near the tuber
- Sufficient period of tuber wettness.

## To get *no* Tuber Blight Infection:

Φ No infections / lesions present in the field

Φ All viable spores killed on lesions

Φ All viable spores killed on the way down the stem

Φ --

Φ Harvest tubers before period of tuber wettness.

( Φ means "OR" )

## Conclusions on modelling

- Occurrence can be modelled reasonable accurate
- Quantity of occurrence difficult
- Model proved good research and analysing tool
- Effect fungicide treatment to be modelled
- Model available for use on “Akkernet”

# Modelling Tuber blight with PLANT-Plus

A grower should keep his crop clean of Late Blight;

It is the only way to be

*Growing in confidence*
