

Early blight in Germany

(*Alternaria solani* & *Alternaria alternata*)

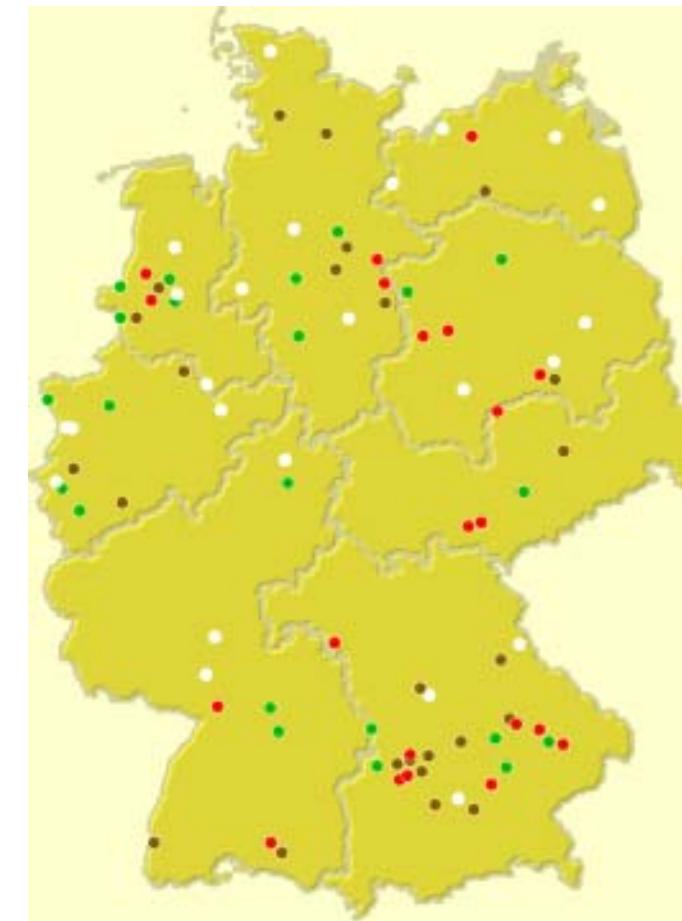

H. Hausladen & J. Leiminger

Introduction

early blight
august 2006

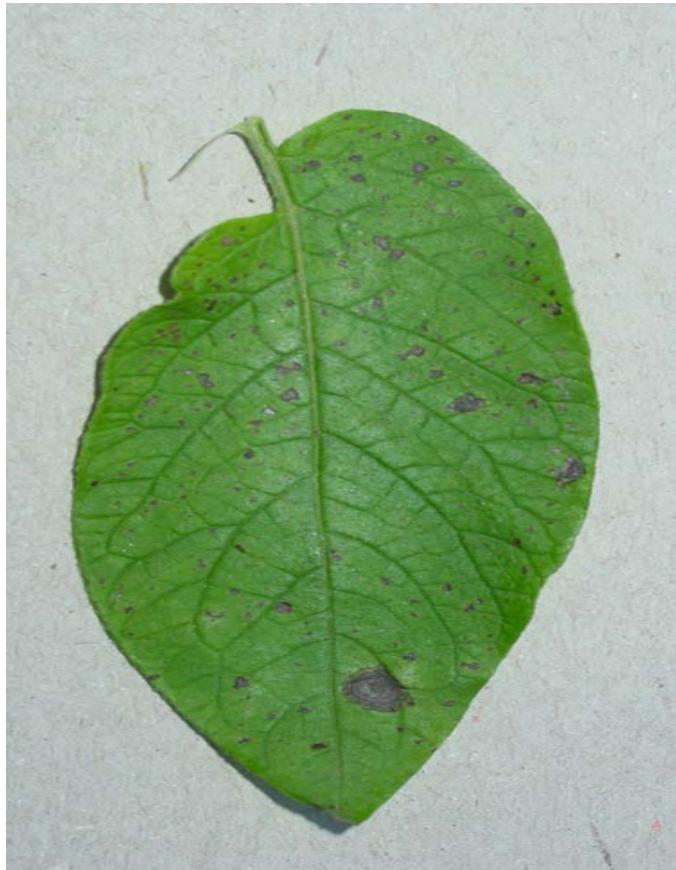

- no disease
- low disease
- moderate disease
- high disease

www.krautfaeule.de

Introduction

Introduction

Alternaria solani

„real pathogen“

- 150-300 µm

- N-HST (non host specific toxins)
(e.g. alternaria-acid)

Alternaria alternata

direct, indirect

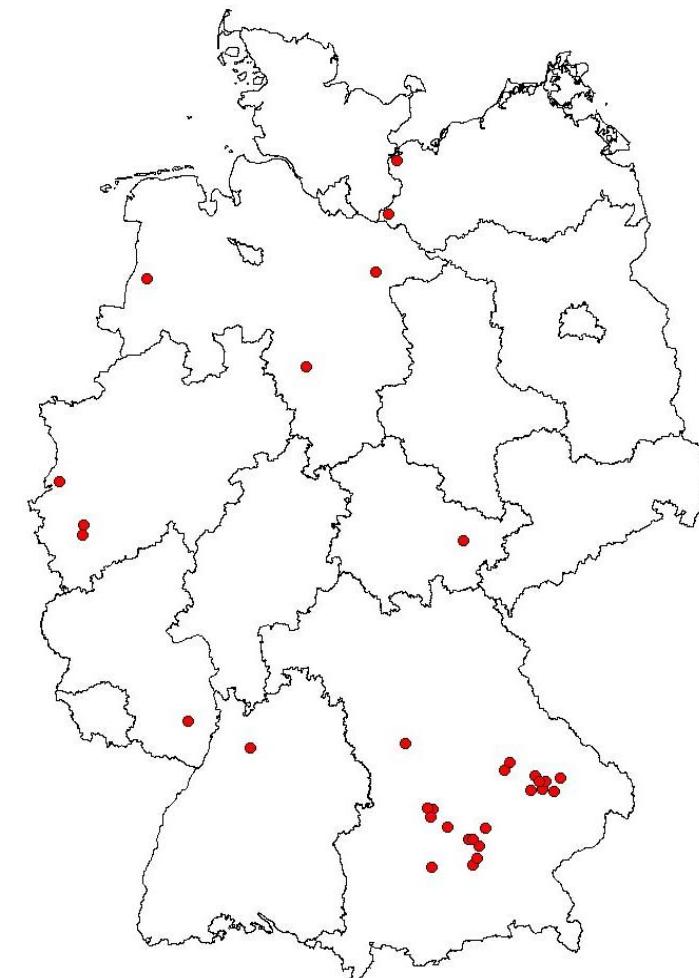

- 20-63 µm

- (HST)
- N-HST
(e.g. tenuazon-acid)

Materials and methods

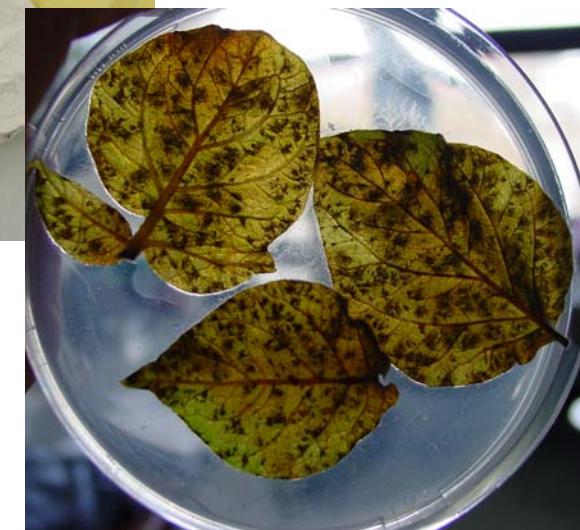

Year 2006:
samples from
34 locations

Materials and methods

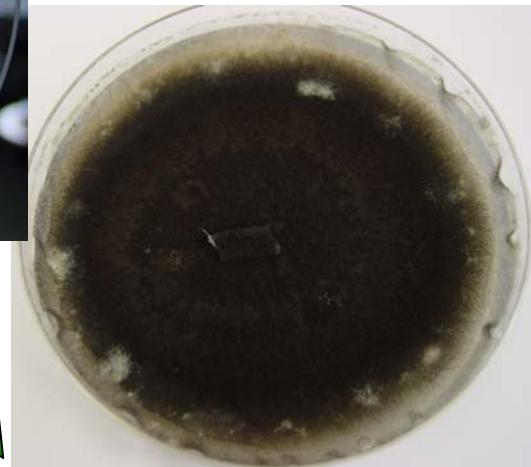

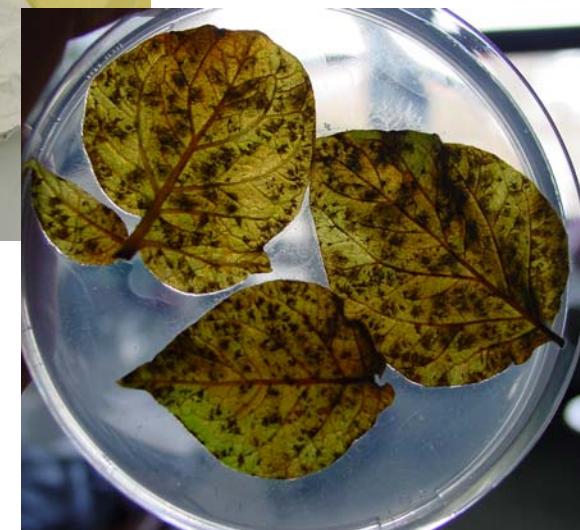

Materials and methods

Infected leaves
→ Petri dishes

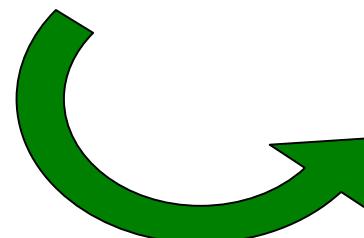

Materials and methods

Infected leaves
→ Petri dishes

Isolation

single spore isolates

Results 2006

location	date	variety
Buir	07. Aug	Gourmandin
Növenich	07. Aug	
Uelzen	07. Aug	Kuras, Lolita, Solara
Puch	17. Aug	
Waldniel	23. Aug	Bintje
Buir	23. Aug	Bintje, Festina
Harem-Peermoor	24. Aug	Festin, Roberry
Rupenest	24. Aug	
Neu Gülzow	29. Aug	Granola
Weihenstephan		Solara, Kuras

Discussion

Control of early blight

- fungicide rating & field trials -

Harmonized protocol for fungicide test against early blight

- Susceptible variety (medium to late maturity group)
- 4 replications
- independend coverspray against late blight with Cyazofamid or Mandipropamid (5 to 7 day spray intervall)
- 4 treatments with the testing fungicides against early blight, 10 day spray intervall
- first application against early blight in dependence of first early blight appearance, however latest 6 weeks after crop emergence.
- fungicide application rate; highest in Europe admitted dose rate

Efficacy in the field

	2004			2005		
	AUDPC ¹	SD ²	Tukey-B ³	AUDPC ¹	SD ²	Tukey-B ³
Kontrolle	2795,0	199,2	a	1876,7	69,5	a
MZ-500	2460,2	153,2	a,b	1754,2	65,2	a
MZ-750	2081,8	280,7	b,c	1722,2	55,9	a,b
MZ-1000	1818,7	195,3	c,d	1531,2	119,2	b,c
MZ-1500	1488,7	218,4	d,e	1421,8	35,9	c,d
MZ-2000	1473,7	189,5	d,e	1248,0	141,9	d
MZ-4000	1240,33	205,5	e	949,3	84,1	e

Summary & outlook

- *A. solani* and *A. alternata* are present in the field
- Isolat studies (*A. solani* – *A. alternata*)
- artifical inoculation for specific rating

Thank you for your attention

Early blight in Germany

(*Alternaria solani* & *Alternaria alternata*)
